

DO YOU SUFFER FROM CHRONIC NASAL OBSTRUCTION?

If you experience persistent nasal symptoms due to nasal airway obstruction and are receiving the VivAer procedure, you may qualify for a clinical study.

You may qualify for this study if you:

- Are 22 years of age or older
- Experience severe nasal airway obstruction
- Plan to undergo the VivAer procedure to help improve your nasal breathing

If you volunteer and qualify for this study, you could receive up to \$500 for your participation.

Nasal airway obstruction (NAO) is a common condition that restricts airflow through the nasal passages, leading to discomfort and breathing difficulties. It can cause symptoms such as congestion, headaches, fatigue, sleep disturbances, and even impact daily activities and overall quality of life.

If you experience any of these symptoms and are planning to receive the VivAer procedure, consider participating in our study. Contact us today to learn more!
